Earth-Science Reviews, 31 (1991) 299
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 31, 1991

A review of the rate of pyrite oxidation in aqueous systems at low temperatures
S. Bierens de Haan (Reading, UK) 1
Geomorphology and seismic risk
M. Panizza (Modena, Italy) 11
Subaqueous, intermediate to silicic-composition explosive volcanism
J. Stix (Montréal, Que., Canada) 21
The application of multivariate permutation methods based on distance functions in the earth sciences
P.W. Mielke Jr. (Fort Collins, CO, USA) 55
Towards a comprehensive classification of igneous rocks and magmas
E.A.K. Middlemost (Sydney, Australia) 73
Bedload transport
B. Gomez (Terre Haute, IN, USA) 89
The Larderello geothermal field: a review
A. Minissale (Florence, Italy) 133
Geology and tectonics of the Betic Zone, SE Spain
R. Weijermars (Uppsala, Sweden) 153
H-type (hybrid) granitoids: a proposed revision of the granite-type classification and nomenclature
A. Castro, I. Moreno-Ventas and J.D. de la Rosa (La Rábida, Spain) 237
Hierarchy and scales in marine ecohydrodynamics
J.C.J. Nihoul and S. Djenidi (Liège, Belgium) 255

Book Reviews
Climatology 279
Environmental management 280
Geomorphology 282
Geotectonics 283
Geothermometry 286
Glaciology 286
Historical geology 287
Hydrogeology 289
Oceanography 289
Sedimentology 291
Stratigraphy and palaeoenvironments 293
